

QUICK GUIDE

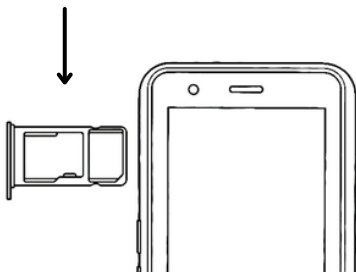

SIM Card

Keyphone is compatible with all SIM cards.

Use the SIM ejector to gently **push and open** the SIM tray.

Place the SIM card into the tray and insert it back into the phone.

Alternatively, you can activate an eSIM: Go to Settings > Network Settings and follow the eSIM activation steps.

Insert the battery:

Lift the back cover from the bottom-left corner and insert the battery.

Power On/Off

Volume Up/Down

Tip:
Capture a screenshot easily by pressing the **Power+Volume Down** keys.

6 Notifications

Importing contacts

Option 1

Bluetooth

- Export contacts as a single **VCF** file.
- Send the file to your **Keyphone** via **Bluetooth**.
- On Keyphone, **accept and import** from the notification pop-up.

Option 2

SD Card

- Copy your contacts (**VCF file**) to an SD card.
- Insert the SD card into your **Keyphone**.
- Go to **Files** → open the VCF file → select **Import**.

Option 3

MMS

- Send the **VCF file** via **MMS** from your current phone to your Keyphone.
- Open the message on Keyphone and **import** the file.
